Past all .ov2 files copied on the point 3 of this tutorial For do this go menu, edition, past OR simply do CTRL+V with the keyboard.

Once the copy operation is complete (it's very fast) turn your TomTom then disconnect the USB cable.

5) Displaying points of interest on your TomTom GPS

Restart your GPS.

Following the model of your GPS handling display points of interest on your GPS may differ.

Exemple TomTom XL 2013

1) Go to Explore the map

2) If the points do not appear go to choose POI

3) Select the PI park4night that interests you. (they are prefixed by P4N). Press **finished**

4) You should see the POI on the map of your GPS. Feel free to zoom in and out to reveal the POI.

When there are too many points on the map, some issues appear, you need to zoom in to see them reappear.

Exemple TomTom XL year 2009

1) Go to the menu and press **Change Preferences**

2) Then press Show POI on map

3) Select the PI park4night that interests you. (they are prefixed by P4N). Press **finished**

4) Tap Browse Map

5) You should see the POI on the map of your GPS. Feel free to zoom in and out to reveal the POI.

When there are too many points on the map, some issues appear, you need to zoom in to see them reappear.
